**SUPPLEMENTARY INFORMATION:**

*Title:* Bees and Related Articles.

*OMB Control Number:* 0579-0207.

*Type of Request:* Extension of approval of an information collection.

*Abstract:* The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States.

Under the Honeybee Act (7 U.S.C. 281 through 286), the Secretary is authorized to prohibit or restrict the importation of honeybees and honeybee semen to prevent the introduction into the United States of diseases and parasites harmful to honeybees and of undesirable species such as the African honeybee. This authority has been delegated to the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture.

The establishment of certain bee diseases, parasites, or undesirable species and subspecies of honeybees in the United States could cause substantial reductions in pollination by bees. These reductions could cause serious damage to crops and other plants and result in substantial financial losses to American agriculture.

Regulations for the importation of honeybees and honeybee semen and regulations to prevent the introduction of exotic bee diseases and parasites through the importation of bees other than honeybees, certain beekeeping products, and used beekeeping equipment are

contained in 7 CFR part 322, “Bees, Beekeeping Byproducts, and Beekeeping Equipment.”

These regulations require the use of certain information collection activities, including application for a permit, State consultation, written agreement to permit conditions, appealing denial of a permit application or revocation of permit, packaging and labeling, notice of arrival for shipments from approved regions, transit shipment, port of entry inspection, notification of escaped organisms, emergency action notification, request for release, request for risk assessment, request for facility approval, and recordkeeping for containment facilities.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

*Estimate of burden:* The public burden for this collection of information is estimated to average 0.26 hours per response.

*Respondents:* Importers, exporters, and shippers of bees and related articles; foreign and State governments; and containment facilities.

*Estimated annual number of respondents:* 8.

*Estimated annual number of responses per respondent:* 31.

*Estimated annual number of responses: 250.*

*Estimated total annual burden on respondents: 64 hours.* (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 31st day of July 2023.
